Boddepalli Venkata Sai

LinkedIn: https://www.linkedin.com/in/venkatasaiboddepalli/ Email: boddepallivenkatsai2005@gmail.com
GitHub: https://github.com/venkatasaiboddepalli Mobile: +91-9347475262

Skills

Languages: C/C++, Python, Java, JavaScript
Frameworks: Pandas, NumPy, Seaborn, Matplotlib, Scikit-Learn, HTML, CSS
Databases: MySQL
Tools/Platforms: Microsoft EXCEL, Power BI, VS Code, Jupyter, Notebook, Linux/Ubuntu
Soft Skills: Problem-Solving, Team Player, Adaptability

Projects

Inventory Management System | GitHub Link Aug 25

- Built a complete web-based inventory management system to efficiently manage products, stock levels, item records with a focus on usability and performance
- Implemented full CRUD functionality (Add, Edit, Delete, Search) using JavaScript and DOM manipulation to enable real-time inventory updates without page reloads
- Designed a responsive and intuitive user interface with structured form validation to ensure accurate data entry and smooth user interaction across devices
- **Tech:** HTML, CSS, JavaScript

Daily Market Price Analysis of Agricultural Commodities | GitHub Link Apr 25

- Conducted in-depth analysis of daily agricultural commodity prices in India by cleaning, normalizing, and organizing raw datasets to improve data reliability
- Applied descriptive statistical techniques such as mean, median, and variance, and used PivotTables and charts to identify pricing trends and market fluctuations
- Developed interactive Excel dashboards using conditional formatting and visual analytics to support data-driven insights and decision-making
- **Tech**: Microsoft Excel, Data Visualization

Real-Time Air Quality Index (AQI) Data Analysis Project | GitHub Link Mar 25

- Performed comprehensive exploratory data analysis on real-time AQI datasets collected from multiple locations to understand pollution patterns and trends
- Cleaned and preprocessed data by handling missing values, outliers, and inconsistencies, and transformed datasets using Pandas for efficient analysis
- Visualized pollutant distributions and temporal AQI trends using Matplotlib and Seaborn to derive meaningful environmental insights
- **Tech**: Python, NumPy, Pandas, Matplotlib, Seaborn

Training

Lovely Professional University — Summer Training | Certificate Link Jul 25

- Applied Data Structures and Algorithms (DSA) concepts to solve real-world problem statements, focusing on writing efficient and optimized solutions.
- Implemented searching and basic optimization techniques to improve data retrieval speed and overall program performance
- Designed clean, modular, and structured logic using arrays, lists, and other core data structures while following object-oriented programming principles
- Worked extensively with C++, Data Structures & Algorithms, OOP concepts, and Git for version control and code management

Certificates

- Privacy and Security in Online Social Media | NPTEL Oct 25
- The Bits and Bytes of Computer Networking | IBM Oct 24
- Introduction to Hardware and Operating Systems | Google Nov 24
- Digital Systems: From Logic Gates to Processor | UAB Sep 24

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.7** Since Aug 23

Tirumala Junior College Rajahmundry, Andhra Pradesh
Intermediate; **Percentage: 96.9%** Jun 21 – Mar 23

Sasi English Medium School Rajahmundry, Andhra Pradesh
Matriculation; **Percentage: 99%** Jun 20 - Mar 21
